

Sequin Fonts

Sequin Fonts

Sequin fonts are available to embroiderers who have upgraded their software to include the Sequin option.

- View Sequin fonts sample pictures, available keystrokes, font versions, recommended heights and any special notes for available Sequin fonts.

Sequin Fonts

[Sequin Fonts](#) : Sequin Block 1

Sequin Block 1

Available Keystrokes

The following lists the keystrokes available for the Sequin Block 1 font.

Available Keystrokes

ABCDEFGHIJKLMNOPQRSTUVWXYZ
0123456789

Font Version

The font version for the Sequin Block 1 font is Version 1.

Special Notes

- Sequin fonts do not work with all sequin tack-down styles; they are optimized to work with styles 4 or 6. Other styles may cause interference between the tack-down stitches and the sequins themselves.
- This font is optimized to be used with an offset equal to 50% of tack-down length (that is, an overlap of 50% of sequin size).
- Recommended minimum letter height depends on the size of the sequin being used; please refer to the Recommended Heights table, below.

Recommended Heights

Sequin Size

Minimum Height

| | |
|------|--------------------|
| 3 mm | 12 mm/0.475 inches |
| 5 mm | 20 mm/0.787 inches |
| 7 mm | 27 mm/1.06 inches |
