Formal Script 4 mm is a Manual stitch font that is not scalable. The font height must be 4.0 mm.

Note

- For best results, use 60-weight (75 d/2) rayon thread; however, 40-weight (120 d/2) rayon thread is an acceptable alternative.
Formal Script 4mm sews best on twill. If sewing on polo pique or shirt fabric, place a fill segment in the same color as the shirt material behind the text as a stabilizing layer. The stitch angle of the backfill should be 35 to 50 degrees.
Ensure that the Minimum Stitch Length is set to 0.3mm and not 0.5mm, which is the default. Using 0.5mm as the Minimum Stitch Length may result in important stitches being filtered from the lettering.
Formal Script 4mm can be used with versions 10.3.7.2462 and higher.
